- HTML/CSS

Summary

Software developer with some experience in full-stack web development and general scripting.

Experience

PONDERCEL S.A DE C.V

Web Development Intern, September 2020 - February 2021

As an intern, I developed full-stack web applications with Python and Django, determining the needs of the user and their department. Apart from that I also provided second hand help at necessary times for technical support.

DataZone

Technical Analyst 1, April 2021 - May 2021

I offer technical support to Autozone stores in the United States and Mexico, solving problems related all the way from printers to operating systems and networks.

Independent Game Developer

May 2021 - Current Date.

To continue developing my programming skills, I decided to develop video games focusing on scripting with C# and C++. To this day I have developed and published 6 video games.

All my projects and games are visible on my portafolio.
